

WHOLE SCHOOL SAFETY PLANNING

Last Updated: January 24, 2018
Updated By: Amanda Meyer

OVERALL COMPOSITE SCORE: 2.50

Based on your responses, this is a *progressing domain* for your school. Because your score indicates you have many of the building blocks/foundational steps for this domain in place, there are a number of next steps you can take to further enhance your school's programming in this area. Please refer to the *Whole School Safety Planning Guide*, which will allow you to determine which next steps are appropriate for your school and will provide you with resources to take these next steps.

About Whole School Safety Planning

Whole School Safety Planning includes procedures and activities for monitoring and maintaining physical safety on a school campus. Your school's Whole School Safety Planning score comprises your ratings on four indicators: (1) your assessment of the safety and predictability of your school campus; (2) implementing a standardized approach for adequate staff supervision of students across public spaces; (3) establishing and following a clearly defined process to determine when a student represents a harm to other students or staff; and (4) staff training in bullying prevention.
