Overview
The CRAFFT 2.0 is a behavioral health screening tool that measures high-risk alcohol and other drug use behaviors for adolescents. The CRAFFT 2.0 enhances sensitivity of the original CRAFFT. CRAFFT is a mnemonic acronym of the first letters of key words in the six screening questions. When administering the clinician interview version, the questions should be asked exactly as written.

Clinician, 9 items (for ages 12-18)

Subscales
N/A

Sample Items
- During the past 12 months, on how many days did you drink more than a few sips of beer, wine, or any drink containing alcohol?
- Have you ever ridden in a CAR driven by someone (including yourself) who was “high” or had been using drugs?
- Do you ever use alcohol or drugs to RELAX, feel better about yourself, or fit in?
- Have you ever gotten into TROUBLE while you were using alcohol or drugs?

**Administration, scoring rules, & interpretation**

Administer the CRAFFT in two parts:

- Part A (substance use frequency in past 12 months):
  - If the youth answers “0,” only administer question 1 in Part B (CAR question).
  - If any answer more than “0” is provided, administer Part B.

- Part B (CRAFFT 2.0 questions):
  - Sum all “Yes” responses.
  - A score of 2 or higher suggests a “Positive Screen,” indicating a need for a more thorough interview regarding context of use, frequency, and other risks and consequences of alcohol and other drug use.
